

# BLUEGAME BG72

## CROSS-OVER SOUL

The World premiere of the new 72 foot yacht - the evolution of the iconic BG range that encompasses all the excellence offered by Bluegame - took place at the Cannes Yachting Festival 2021.

The outdoor areas are arranged over three levels

The new Bluegame B672 is the perfect expression of her cross-over soul, which escapes the tendency to belong to a single segment. With the B672, Bluegame goes even further, combining the concepts of the B6 and B6X ranges; the result is a successful fusion of open and fly bridge. The B672's remarkable layout, with a completely open upper deck and the original lower deck of the B6X range, is destined to bring lovers of both typologies together, without compromise. Designed like all Bluegame models by Architect Luca Santella, the B672 maintains the engineering chassis of the B6X models with the high-performance hull created in collaboration with the naval architect Lou Codega and the advanced Volvo IPS propulsion system that ensures high performance and low consumption.

The B672 inherits from the B6 range the original simplicity of use, easy maneuverability, comfort and safety during navigation while she offers for the first time on an open yacht a cockpit with 360° visibility characterized by a windscreen with inverted glass and the possibility to close it off completely which guarantees protection in adverse weather conditions or privacy in the presence of the crew.

Once again, Bluegame has benefited from the fruitful collaboration with Zuccon International Project, which has given great personality to both the profile and the interior and exterior spaces.

A special bow area

Main salon

The outdoor areas are arranged over three levels; the beach area in close contact with the sea, the large living area with sunlounges/sofa in continuity with the dining area, a spacious bow area, equipped and flexible on the main deck and, finally, an easily accessible and enjoyable sundeck.

The interiors can be tailored to the owner's needs, depending on whether life on board is more convivial or more private: the saloon with direct access from the platform, as on the B3X, can be replaced by the owner's cabin, offering stunning views and the opportunity to wake up in direct contact with the sea.

The owner chose the version with the saloon overlooking the beach area and interiors with very distinctive materials and colours: Canaletto walnut wood combined with leather and fabrics in light and blue tones that convey personality and sophistication.

Beach area

SPECIFICATIONS

CONCEPT	Luca Santella
DESIGN	Luca Santella & Zucchi International Project
HULL DESIGN	Luca T. Cadege
LENGTH OVERALL (LOA)	22.82 m
LENGTH (LH)	21.15 m
